Hope opens the way to success. NO REST NIGHT OR DAY.

With Irritating Skin Humor-Hair Began to Fall Out-Wonderful Result From Cuticura Remedies.

"About the latter part of July my whole body began to itch. I did not take much notice of it at first, but it began to get worse all the time, and then I began to get uneasy and tried all kinds of baths and other remedies that were recommended for skin humors, but I became worse all the time. My hair began to fall out and my scalp itched all the time. Especially at night, just as soon as I would get in bed and get warm, my whole body would begin to itch, and my finger nails would teep it irritated, and it was not long beore I could not rest night or day. A friend asked me to try the Cuticura Remelies, and I did, and the first application elped me wonderfully. For about four weeks I would take a hot bath every night and then apply the Cuticura Ointment to y whole body, and . kept getting better, and by the time I used four boxes of Cuticura I was entirely cured and my hair stopped falling cut. SOUTHERN . FARM . NOTES.

TOPICS OF INTEREST TO THE PLANTER, STOCKMAN AND TRUCK GROWER.

Nuts on the Farm. The following is from The Peach

ture. Occasionally in the past there heavier from light seeding. appeared on the market an unusual this line of work is assuming the importance of an industry.

nut trees will afford not only pleasure in them was \$21.10, while the value in their care, but also considerable of two successive crops of corn, plus profit, their worth as a cultivated the value of a crop of cowpeas sown crop will be appreciated and careful in the first crop, was \$33.54. attention will be given them.

Nuts and raisins! What dish is more wholesome or delicious, or healthful? | tity of hay and more than three times What food have we that combines the quantity of peas than when sown flesh materials and energy producing in August. It is usually profitable in material so cheaply, so completely?

And now nut trees can be well combined with farming. Think of the road-sides, often for miles devoid of a greater increase in the yield of wheat trees. I can think of nothing that that followed than was secured from would add more to the value of a farm than nut trees of various sorts along the fence rows and the road sides. Aside from the shade they injurious effect upon grain sown soon would make, the improved appearance they would present, would come the commercial value of the crop. Of course this phase would not bring the financial reward that a cultivated. grain was sown the following spring. specially formed nut grove would. Still its importance should not be 57.5 per cent. increase over oats foloverlooked.

The old road-sides and permanent fence rows and old creeks and branches would be ideal so far as nuts and hickory nuts.

stock, plant the nuts, but look after | tion of grain to straw. them a little. Keep the weeds down; dig around the young sprouts once or twice a year. A bit of fertilizer will fickle the roots, and a little breeding in this way will bring about a faster growth and a quicker full harvest. Cuba leads the Florida Times-Union Then don't neglect an occasional watch to estimate the impoverishment of the over the young trees as they grow. soil thereby, and to urge the slaughter-The caterpillars are enemies; burn ing of cattle and the utilization of them out. Trimming will pay by making a better appearing tree.

By caring for trees in this manner you can expect rather quick returns. In more Northern climates, native walnuts, pecans, and hickories will usually bear when they are twelve to fifteen

Chestnuts come in at a still earlier age. In the Southern States most nut | and offal, constituting the most valutrees that have been given care and able source of fertilizer, and with the attention will produce crops in five other it purchases from the North or ten years.

ceive attention similarly given to the er. It shows that the hides could be apple, the peach or the pear; that is, converted into leather on the spot, the orchards should be plowed and with tannin derived from the red mancultivated; the soil improved in a phy- grove, that the slaughtered beeves sical way through the use of legumes, | would supply all the plasterer's hair cowpeas and clover. Fertilizers needed in several States and large should also be added to feed the tree; and what else is needed to make good. vigorous, healthy growth should be

What is said here, is not a discussion about the commercial nut orchard; different treatment is needed there. There is a plea for nuts on the farm: a side issue that will mean good results in many ways. It means a larger idea of the farm. We have bama, Mississippi and other States looked too long on the farm as corn | cease to ship their young stock to or wheat or cotton producer. Let us Kansas to be fed there and brought look on it as the great American in- back to the starting point in the shape stitution and let us grow nuts to help make that institution complete.

Tests With Cowpeas.

The Arkansas Agricultural Experiment Station in bulletin No. 70 gave the result of valuable tests with cow peas. The bulletin is summarized as follows: 1. The cowpea is thoroughly adapted

er variety of purposes, and may be need not work for its living, but, remore profitably grown than any other lieved from the grinding necessity of

Station grounds. 3. It is the surest crop and the

W. L. DOUGLAS, Brockton, Mass.

A new wrinkle in promotion schemes is being unfolded by a business concern having headquarters in the Illinois metropolis. A specialty of this enterprise is to furnish "money raising plans for church workers." The firm announces:

"If you wish to raise cash easily and quickly for any church, Sunday school or society fund, send a postal to-day. Our recently published new method souvenirs of church and pastor have already realized in cash upwards of two hundred thousand dol-

A typical form of indorsement reads in this fashion: "We will send you hundreds of letters in which real church workers tell how they use the plans we submit."

Evil of Too Many Churches.

America has too many churches Towns which might be well administered spiritually by one clergyman or two have six, eight or ten. No one of the six or more congregations can pay for a good preacher. Few of them can pay all the cost of any preacher, however poor. Nor can any one of them pay for all the time of their spiritual leader. So only very young men are to be had and the deserves tersely and justly: "No busi trons. ness could flourish by that method and few churches can."-Washington

Captured a Neighbor's Cat.

This last summer members of the Inited States fish commission were stationed at Lake Maubogog, Me., for the purpose of gathering statistics in regard to the finny tribes which inhabit that region. The guests of the small hotel where they made their headquarters were very much annoyed by the too frequent appearance of a skunk, and steps were taken to capture the offender.

A box trap was constructed, duly baited and set. Through small holes in the box the guests were highly elated to learn the following morning that their efforts had not been in vain.

The fish commission men, thinking it an unusually fine specimen, decided to preserve its pelt, minus the objectionable odor, if possible, and, gently handling the box, they proceeded to the lake, carefully lowered it into the water, removing it when all life was extinct.

This capture will probably not appear in their next report, as the animal proved to be a black cat belonging to the next farmhouse.

Meteors Buried in Cellar.

Excavations for a cellar in Whitman has revealed two meteors weighmands upon their time cover so wide ing about 600 pounds each. They had a territory that preaching must be all been buried for a number of years' most their exclusive occupation and | and were torpedo shaped. As to Slugging.

"The English play football, and yet don't slug." That sentence from an American paper, quoted in these columns yesterday, employs the same verb "to slug," of course, which appears in "slugger," a pugilist, and "slugging match," a prizefight. It is own brother to "slog," and akin to "slay." Absolutely different in origin. as in meaning, is the other verb, "slug," own codein of "Monch" and "slack," which Spenser used intransitively when he wrote of "slugging all night in a cabin," and Milton transftively when he declared that episcopacy "worsens and sings Godavari River and placed in the local Indian the most learned and seeming religious of our Ministers." Yet. curiously enough, nobody knows to which to the two families "slug." a. crudely shaped bullet, belongs. It is something with which one slogs? Or something as heavy as a "slug," or "sluggish" person? Or was it supposed to resemble the sing that crawls in gardens? - London Chron-

Richard Arthur, M. P., president of the Immigration League of Australia, has been pointing out some startling facts in reference to the lack of population in the Commonwealth. In the vast northern territory there are only 820 whites, or one inhabitant to every 700 square miles. The immense empty spaces, he says, cry out for population. The world has grown so small that the only solid title to any part of its surface is effective occupation. Modern methods of transit have brought the vast, unoccupied northern territory of Australia within easy reach of the teeming Asiatic peoples.
